JOHN N. CHRISTENSON

SHIP'S HISTORY 1998

1. Command Composition and Organization.

- a. USS MCCLUSKY (FFG 41) is a third flight Oliver Hazard Perry class guided missile frigate, named after Rear Admiral Wade McClusky, a hero of the battle of Midway. Her primary mission is general escort duty of convoys, amphibious task forces, underway replenishment groups, and carrier battle groups, defending these high value units against subsurface, surface and low level air threats. With her embarked air detachment, (two SH-60B helicopters), the LAMPS MK III team provides formidable capabilities in over-the-horizon surface detection, surveillance, and engagement of hostile warships and submarines.
- b. MCCLUSKY is a member of Destroyer Squadron SEVEN, commanded by Captain Dave Ryan.
- c. MCCLUSKY's Commanding Officer is Commander Micheal J. Turner, U.S. Navy.

d. USS MCCLUSKY deployed with HSL 47 Det 6 from 29 Jun – 13 Aug (RIMPAC) and from 10 Nov – 31 Dec (Arabian Gulf) as part of Carl Vinson Battle Group (CVINBG).

3. Narrative

USS MCCLUSKY began her new year with preparations for the Inter-Deployment Training Cycle. Beginning in **January**, MCCLUSKY successfully completed CART II, TSTA II, TSTA III, and FEP by 15 May 1998. Documents 1 and 2 list CART II Schedule of Events (SOE) and MCCLUSKY's CART II Assessment.

From January through November, MCCLUSKY conducted 48 underway and three inport refueling operations for both DFM and JP-5. All were completed safely and without incident. During RIMPAC 98, MCCLUSKY safely refueled the patrol coastal ships USS SQUALL (PC 7) and USS ZEPHYR (PC 8) on four different occasions while conducting escort duty in the transit to and from Hawaii. Additionally, MCCLUSKY conducted 134 helicopter refuelings.

A successful ammunition on-load in **February** was followed by a successful skin to skin missile engagement against a BQM-37C during MCCLUSKY's first missile shoot of the year. MCCLUSKY completed her Aviation Certification on 28 FEB. This certification was upgraded to an Aviation Readiness Evaluation allowing her flight deck to be fully certified for helicopter operations. MCCLUSKY's Undersea Warfare division participated in numerous USW training events with a high rate of success. MCCLUSKY was the victor in the inaugural Destroyer Squadron SEVEN ASW Rumble.

During the month of March, MCCLUSKY was heavily involved in the Tailored Ship Training Availability Process I and II with Afloat Training Group Pacific (ATGPAC) embarked as assessors of the Integrated Training Teams (ITT) and watchstanders' performance. MCCLUSKY conducted a successful torpedo exercise utilizing the SCORE range off the coast of Southern California (SOCAL) during this period.

During the month of **April**, MCCLUSKY earned her Engineering Certification in just over one day. FEP level qualifications for Engineering and Survivability Training Teams arrived just as smoothly due to the efficient training and composition of these hand picked teams. With the Air Department embarked, five demanding medevacs were completed including a night medevac during Southern California operations of a critically ill crewman from USNS SIOUX to San Diego, 1200 miles away.

During the month of May, MCCLUSKY successfully completed her Cruise Missile Tactical Qualification and Final Evaluation Problem (FEP) in all warfare areas. Continuing with its success, MCCLUSKY fired a MK 46 torpedo from its external SVTT during the FEP allowing MCCLUSKY's USW Team to achieve all of its USW training objectives. Only a week after FEP, MCCLUSKY successfully completed a combined INSURV and CSRR. INSURV Inspectors stated that "MCCLUSKY was the most prepared and best self assessed ship surveyed in years." Successfully completed a NAVOSH inspection with INSURV and Regional Support Organization (RSO) on two separate occasions with all programs graded satisfactory. Additionally, an Industrial Hygiene Survey, Environmental Health Survey, and Sound Level Survey were conducted by Navy Environmental and Preventive Medicine Unit, with all programs being assessed as satisfactory. MCCLUSKY completed a successful Navigation Certification with "outstanding" results. Additionally, the Communications Division completed a successful Comprehensive Communications Assessment, receiving a composite score of 94.8 percent.

During the month of **June**, MCCLUSKY personnel performed depot level refurbishing of both rapid securing devices (RSD) for the SH-60B prior to RIMPAC 98 and upgrades were performed on the horizon reference system, a critical component of night flight operations.

During RIMPAC '98 (June – July), MCCLUSKY participated in two missile exercises, which included a successful surface to surface SM-1 missile shot. MCCLUSKY USW tactics ensured the only confirmed kill of the exercise against an opposing force diesel submarine. Although possessing an equipment limited communications suite, MCCLUSKY demonstrated its ability to maintain connectivity not only with foreign navies during RIMPAC '98 but again during her deployment with CARL VINSON Battle Group's in the complex C2W environment of the Arabian Gulf. Furthermore, MCCLUSKY's professionalism and intense focus on safety resulted in the smooth and safe integration of several multi-national helicopters into the TF operations during RIMPAC '98. Operations included units from the Australian, Canadian, Chilean and Japanese Navies.

During the month of August, MCCLUSKY completed three satisfactory Pacific Fleet diesel inspections on Numbers 1, 2, and 4 SSDG's, a replacement of Number 4 SSDG and a pre-deployment inspection of Number 3 SSDG.

During the month of **September**, MCCLUSKY conducted a successful airdrop of a Mk 46 torpedo with HSL 47 Det 6 against an EMATT. On September 21-25, MCCLUSKY got underway from San Diego as part of CVINBG for Sustainment training. The training was scheduled to support a change in the BG's deployment date and was designed to maximize proficiency in all warfighting areas and to stress CVW-11's ability to conduct sustain flight operations. Additionally, each Crudes unit was required to conduct both day and night boardings of a non-compliant, non-belligerent vessel. Document 3 describes the overall battle group underway assessment.

During the month of **October**, MCCLUSKY successfully completed an air conditioning and refrigeration MACHALT. This machinery alteration allowed MCCLUSKY to switch to the environmentally safe R-134a.

Following a flawlessly executed ammunition on-load, MCCLUSKY deployed with the CARL VINSON BATTLE GROUP in **November**. MCCLUSKY was assigned

to successfully escort CARL VINSON during much of her operations in the northern Hawaiian OPAREA during ASWEX 99-1. Document 4 describes the overall goals, tactics and structure of the exercise. At no time during this period did MCCLUSKY's USW equipment readiness drop below 100 percent.

During the month of **December**, MCCLUSKY completed a four day port visit to Singapore. The Wardroom was extended an invitation to the residence of COMLOG WESTPAC RADM Steve Loeffler during this visit. Documents 5, 6 and 7 provide further detail for this visit. MCCLUSKY navigation team skillfully navigated through Singapore's 420 nautical miles of extremely congested waterways to get there. The transit began in the Straits of Malacca, an area renowned for its high density of merchant shipping and fishing vessels. The bridge and CIC teams skillfully plotted the ship's position, maintaining the ship on its planned intended movement (PIM) as it navigated through areas of extreme hazards. The bridge and CIC teams tracked and recorded 102 surface contacts during this 18 hour transit. Document 8 describes the Singapore Strait and Strait of Malacca transit plan. MCCLUSKY second and final port visit of the year was Phuket, Thailand. Document 9 details the four day port visit to Phuket in company with USS RAINIER, USS ANTIETAM, USS FITZGERALD, USS OLDENDORF and USS COLUMBUS. On the heels of OPERATION DESERT FOX, MCCLUSKY entered the Arabian Gulf in late December and immediately became the busiest Maritime Interception Operations (MIO) platform in the Northern Arabian Gulf (NAG). MCCLUSKY conducted near-round the clock surveillance operations utilizing onboard systems, as well as, two SH-60B aircraft while heavily engaged in MIO Operations in the Arabian Gulf. In less than seven days on station, MCCLUSKY had accumulated more than 10 boardings involving merchant vessels headed to or from Iraqi ports.
